

BRYCE GARDNER

Data Analyst

(770) 286-9199 | brycegardner90@gmail.com | Atlanta, GA | [linkedin.com/in/bryce-gardner-16a889183](https://www.linkedin.com/in/bryce-gardner-16a889183) | github.com/brycegardner90 | brycegardner90.github.io

PROFESSIONAL SUMMARY

Data analyst with a BBA from the University of Georgia (3.91 GPA, Summa Cum Laude) and a Google Data Analytics Certificate. Built a portfolio of 19 independent analytics projects spanning SaaS, finance, sports, civic data, and live API pipelines — each delivered end-to-end: Python data cleaning, SQLite querying, and published Tableau or Power BI dashboards. Background in operations management drives a business-first analytical approach: findings are framed as decisions, not just charts.

TECHNICAL SKILLS

Analysis	Python (pandas) · SQL · SQLite	Visualization	Tableau Public/Desktop · Power BI · Google Sheets
Spreadsheets	Excel · Google Sheets	Tools	GitHub · DB Browser for SQLite · QuickBooks · Excel

PORTFOLIO PROJECTS

SaaS Customer Churn Analysis

[Python](#) · [SQLite](#) · [SQL](#) · [Tableau](#)

github.com/brycegardner90/saas-churn-analysis

- Analyzed 505K+ customer records to identify that monthly-contract customers churn at 90.2% vs 46% for annual plans — directly sizing revenue at risk by contract type
- Discovered support call volume as a near-perfect churn predictor; built Tableau dashboard with KPI cards, contract-type filters, and churn-driver breakdown
- Part 1 of a connected 3-project SaaS series with cross-linked READMEs and consistent data pipeline structure

SaaS Sales Pipeline Analysis

[Python](#) · [SQLite](#) · [SQL](#) · [Tableau](#)

github.com/brycegardner90/saas_sales_pipeline_analysis

- Examined 78K+ sales opportunities to surface win/loss patterns by channel, deal size, and product line; identified where deals stall and which segments convert at highest rates
- Delivered actionable recommendations on pipeline prioritization tied to revenue impact, not just conversion percentages

MRR Growth & Cohort Analysis

[Python](#) · [SQLite](#) · [SQL](#) · [Tableau](#)

github.com/brycegardner90/mrr_growth_and-cohort_analysis

- Tracked MRR expansion, contraction, and churn at the cohort level across 397K+ transactions to pinpoint where long-term customer value was won or lost
- Built cohort retention curves and revenue-waterfall views in Tableau to translate subscription trends into executive-ready insight

Restaurant Industry Financial Analysis

[Google Sheets](#) · [SQLite](#) · [Tableau](#)

github.com/brycegardner90/restaurant-industry-analysis

- Compiled and analyzed 25 years of financial performance for 8 restaurant companies across 4 market tiers: revenue trends, margin compression, and competitive positioning
- Demonstrated financial modeling and multi-company benchmarking skills applicable to FP&A and business analyst roles

The Forsyth Boom

Python · SQLite · Tableau

github.com/brycegardner90/Forsyth-Boom

- Analyzed small business formation and population growth trends in Forsyth County, GA — one of the fastest-growing counties in the US — using public economic data
- Designed with local government decision-makers as the target audience; findings scoped to actionable policy and planning implications

Atlanta Rising: A Century of Growth

Python · SQLite · Power BI

github.com/brycegardner90/Atlanta-Rising-A-Century-of-Growth

- Benchmarked Atlanta's 100-year economic trajectory — population, GDP, and industry diversification — against 10 peer US cities from the 1920s through present day
- Demonstrated long-horizon data assembly, normalization across inconsistent historical sources, and multi-city comparative analysis in Power BI

NFL Penalty Bias Analysis

Python · SQL · Power BI

github.com/brycegardner90/nfl-penalty-analysis

- Processed 10 seasons of nflverse play-by-play data across all 32 NFL teams to identify statistically unusual penalty patterns by team and officiating crew
- Applied statistical filtering to separate signal from noise; built Power BI report for multi-dimensional exploration of penalty type, frequency, and game context

Destiny 2 Clan Analytics — Live API Pipeline

Python · SQLite · Tableau

github.com/brycegardner90/Destiny-2-Clan-Analytics-Dashboard

- Built a live data pipeline on the Bungie API pulling raid completions, K/D ratios, dungeon history, and activity trends for a full clan roster in real time
- Demonstrates end-to-end API integration, automated data refresh, and dashboard design for a live, changing data source

EXPERIENCE

Independent Study & Full-Time Parent

Aug 2021 – Present

Self-directed · Cumming, GA

- Completed Google Data Analytics Certificate (7-course Coursera program, June 2023)
- Built 19 independent analytics projects using Python, SQL, SQLite, Tableau, and Power BI; each project documented with README, screenshots, and published dashboard
- Managed household budgeting, scheduling, and financial planning

Bartender & Server

Feb 2016 – Aug 2021

Kona Grill · Alpharetta, GA

- Delivered high-volume bar and table service in upscale casual dining with wine, sushi, and rotating scratch kitchen menu
- Served as frequent closing lead: end-of-shift reporting, cash reconciliation, and enforcement of operational standards across front-of-house staff

Server → Bartender

Jun 2014 – Feb 2016

On the Border · Alpharetta, GA

- Progressed from server to bartender managing high-volume bar service including guest orders, service bar coordination, and batch drink production
- Acted as informal closing lead: end-of-night coordination and server performance standards

First Assistant Manager

Aug 2008 – Dec 2013

Carmike Cinemas · Athens, GA (promoted from Snellville, GA)

- Advanced through four roles: Floor Staff → Shift Leader → 2nd Assistant Manager (Snellville) → 1st Assistant Manager (Athens)
- Managed scheduling, training, and daily operations for 30+ staff; ran full daily operations in the GM's absence
- Maintained Excel-based inventory tracking system and oversaw building maintenance across the facility
- Served as digital projectionist: downloaded, sequenced, and distributed film packages across all auditoriums

EDUCATION

BBA, General Business — Summa Cum Laude · GPA 3.91

May 2020

University of Georgia · Athens, GA

Relevant coursework: Statistical Analysis for Business I · Financial Modeling · Financial Report & Analysis · Operations Management · Financial Management · Consumer Buyer Behavior · Organizational Behavior

AS, Business

Dec 2016

Georgia State University Perimeter College · Atlanta, GA

Google Data Analytics Certificate

June 2023

Google / Coursera · 7-course program

Foundations of Data · Ask Questions to Make Data-Driven Decisions · Prepare Data for Exploration · Process Data from Dirty to Clean · Analyze Data to Answer Questions · Share Data Through the Art of Visualization · Capstone
